PROFILE

Software engineer with 5 years of experience building mobile apps. I specialize in Android (Kotlin, Jetpack Compose), iOS (SwiftUI) and Kotlin Multiplatform. I am the creator and sole developer of **DragBuilder**, an AI app builder I launched in October 2026: people describe what they want and refine it by dragging, no code required. I maintain open-source Kotlin Multiplatform libraries and learn every tool by building with it.

EXPERIENCE

Sistecrédito S.A.S. · Solutions Engineer

May 2023 – Present

- Build and maintain features of the company's mobile app, used by more than 100K people, on Android and on iOS with SwiftUI, in response to business requests.
- Propose and ship improvements and fixes for app errors.

Sophos Solutions S.A.S. · Solution Consultant III

Mar 2023 – Sep 2023

- Contributed to the ongoing development of the “maasApp” application by creating and implementing new features.
- Made proactive proposals to improve the app and resolved the errors identified.

Sistecrédito S.A.S. · Solutions Engineer

Sep 2021 – Mar 2023

- Managed and developed new features of the app in response to business requests.
- Developed the new version of the app with Jetpack Compose and a multi-module architecture.

PROJECTS

DragBuilder dragbuilder.io

Creator and sole developer. AI app builder: describe your app, AI generates the screens, data model and logic, then you adjust anything by dragging. Launched in October 2026 and already in use. Kotlin Multiplatform, Compose Multiplatform, Supabase and Firebase.

AWS-KMP github.com/estivensh/aws-kmp

Extension of the AWS SDK for Kotlin Multiplatform on JVM, Android and iOS. Open source.

KaptureX github.com/estivensh/kaptureX

Camera for Kotlin Multiplatform (Android and iOS). Open source.

Robsi [Android](#)

App for Spanish speakers learning to code: learn, practice and run code. 500+ downloads on Google Play; no longer maintained.

TECHNOLOGIES

Mobile	Kotlin · Kotlin Multiplatform · Jetpack Compose · Compose Multiplatform (desktop & web) · Android · SwiftUI (iOS) · Coroutines & Flow · Ktor · Koin
Backend & cloud	Firebase (Cloud Functions) · Supabase (Postgres, Auth) · TypeScript · Node.js · Next.js · MongoDB · SQL · Cloudflare · AWS (S3) · Google Cloud
Tools	Git · GitHub Actions (CI/CD) · Figma

EDUCATION & CERTIFICATIONS

SENA — Software Developer 2019 – 2020

2nd place in a team project competition.

Platzi — Android Clean Architecture

Platzi — Introductory course to Android with Jetpack Compose

STRENGTHS

Problem solving · Fast learner · Flexible hours · Handling critical situations
